

Product Data Sheet

Q-Band & Clips

General Information

Q-Band is a polypropylene banding system, designed for use in harsh environments such as subsea. Q-Band is designed with “teeth” that allow the connecting clip to grip the band.

Technical Data

Characteristic	Value
Operating Temperature	Minimum: -30 F (-34°C) Maximum: 220 F (104°C)
Loop Tensile Strength	68kg
UV Resistant	Yes

Product Application

Feed Q-Band through the slots on the strapping and fasten using the Q-Clips. Tighten and trim using the Q-gun, taking care not to over tighten as this can cause brittleness.

Download our Strapped Installation Procedure on www.aquasign.com

Packaging

Q-Band is supplied in rolls along with Q-Clips.

Availability

Q-Band and Q-Clips are held as a stock items.
